Dear Hiring Manager,

I'm a Software Engineer with a bachelor's degree. I'm reaching out regarding your Software Intern position, as I'm eager to further develop my skills and become a worthy professional in the field. From front to back, I'm a big fan of programming and have been coding for years.

Throughout my academic journey, I've gained a strong foundation in C++ and Python programming, along with a deep understanding of design patterns, data structures, UML, and diagram creation. My hands-on experience extends to web and app technologies like HTML, JavaScript, CSS, React, Node.js, databases, and Flutter. Additionally, I've honed my skills in Unit Testing and Test Driven Development.

I'm excited about the opportunity to deepen my understanding of software development in a practical environment. I'm looking for a role where I can take on some leadership, contribute to the team, and not just be a bystander. I'm confident that this position will provide the hands-on experience I'm seeking, and in turn, I will bring my strong work ethic, eagerness to learn, and passion for programming to your team.

Thank you for considering my application. I'm looking forward to the possibility of discussing this opportunity further.

Sincerely,  
Carlos Lespin
